• **YAMAHA Only:** use FDB2219SG for SinterGrip SG compound and FDB892ZR for the ZR race compound. (NOTE: FDB892ZR pads require folding down front spring tab to accommodate proper fitment)

FERODO Off-Road Race Compounds:

- ***SinterGrip ZR SuperRace***

This is the new full-metal compound that is becoming the world leader in sintered off-road technology. The HH+ Rated sintered compound is a front-only Pro Race pad developed for Factory level racing.

- Developed for Pro Class Off-Road & Supercross racing
- Ultra high friction yet remarkable control & feel at the lever
- Designed for speed sensitivity, gets stronger the faster you go
- Low abrasion translates into longer rotor life
- Fast bedding-in period

- ***SinterGrip SG Plus***

The SG full-metal compound is the standard in sintered off-road technology. The HH-Rated sintered compound is ideal in dry or wet conditions.

- Developed in world championship level competition
- Excellent performance and stability at low temperature
- Designed to disperse abrasive particles in extreme/muddy conditions
- Extended pad life, 3 x compared with organic
- Fast bedding-in period

SUPERFORMULA - RACING BRAKE FLUID

FERODO Super Formula exceeds the performance of traditional brake fluids:

- Typical Dry Boiling Point 330° C. - higher than any other product on the market. (626° F)
- Excellent compressibility - far lower than silicone based products. Outstanding lubricity for smooth and efficient operation.
- Excellent viscosity index allows efficient operation at both high and low temperatures whilst remaining easy to bleed - unlike "high viscosity" competitor products.
- Fully meets the DOT 4 Specification – which is not the case with all products on the market. This allows the fluid to be used for races run on public roads.
- Last but definitely not least, the Ferodo brand and all that that implies about a product!

FSF050; Super Race Brake Fluid, 500ml, \$39.95 list
